## *Abstract*

The purpose of this study is to find out the picture of conditions in quantity and quality of lecturers today and the implementation of continuing professional development lecturers from lecturer partnership factor at makassar aviation polytechnic. This research uses a qualitative approach by collecting data in terms of documents, literature, and interviews. The research subject was a makassar aviation polytechnic lecturer who numbered 16 people supported by interviews with 3 people in managerial positions. The implementation of the factors studied is the implementation factor of continuing professional development lecturers in terms of lecturer cooperation with other institutions or universities. The results of this study show that from each indicator on the cooperation variables, namely in the implementation of CPD in learning by group activities is good, the implementation of CPD in industry internship activities is still not optimal, the implementation of CPD in professional sharing activities has been good and the implementation of CPD in professional organization member activities has not been optimal.

**Keywords :** *continuing professional development, lecturer, partnership*
